STOP THIS KILLER STONE

CFMEU

4

HOW THE BAN WORKS

Australia has officially banned, as of the 1st of July 2024, the use of engineered stone due to the efforts of the *Stop The Killer Stone campaign from the* Construction, Forestry, Maritime, Mining and Energy Union (CFMEU).

ENGINEERED STONE WILL BE BANNED IN AUSTRALIA FROM 1 JULY

The CFMEU has won our hard-fought campaign to eliminate this killer stone from our country. From 1 July 2024, the use, importation, and manufacture of engineered stone will be banned in Australia.

If not for our members' tireless efforts, this result wouldn't have been possible. You rallied with us, wrote to ministers, shared our content, and advocated for an end to this deadly product. Because of you, more than 100,000 workers won't needlessly die from engineered stone.

The CFMEU remains completely committed to keeping this killer stone off our sites, and we will not allow engineered stone on our sites from 1 July 2024.

Silicosis is preventable and needlessly endangers workers' lives. There are a multitude of alternatives to engineered stone that will not give workers an early death sentence. The companies that have profited from the diminished health and safety of workers have made enough money off their backs, and we are proud to be putting an end to it.

Low respirable crystalline silica formula performances using Imerys minerals

	Standard Formula	Low Crystalline Silica Formula 1
Max. fired bulk density	2,41	2,52
Water absorption (%)	0,1	0,14
Shrinkage (%)	7,64	9,66
L*	75,07	71,13
a*	1,3	2,9
b*	11,1	11,6
Pyroplasticity index (cm-1)	2,49E-05	2,35E-05
Bending strength (MPa)	55-65	60-70
Crystalline silica content		
after firing (%)	15	8

Imeys solutions to reduce Respirable Crystalline Silica in ceramics

Imerys, a global partner with worldwide reach you can rely on

Offering **long-term sustainable resources** from countries renowned for their stability.

- Technical support teams in Western Europe, North Africa and Asia to optimize your formulas.
- Dedicated support for new players starting their lines including on-site training or in our labs.
- Delivery flexibility thanks to platforms in Spain (Castellon), Italy (Modena) and Egypt.

Thank you for your attention
